**DETAILED ACTION*****Allowable Subject Matter***

1. Claims 1-4, 7-17, 19, 21, 24, and 26-33 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: This invention deals with an electrical compression connector having a second radius of curvature that is about 25% smaller than the first radius of curvature (claims 1 & 15). This invention also deals with an electrical compression connector comprising a second conductor receiving channel that comprises opposing concave surfaces having different shapes, wherein a first one of the concave surfaces is located closer to the first conductor receiving channel than a second one of the concave surfaces, wherein the first concave surface has a larger radius of curvature than a radius of curvature of the second concave surface (claim 13). This invention also deals with an electrical compression connector comprising a second conductor receiving channel that comprises opposing concave surfaces having a different radius of curvature, wherein the second section has a bottom cantilevered curved leg forming the second contact surface, and wherein the radius of curvature of the second of the concave surface is smaller than the radius of curvature of the first one of the concave surfaces (claim 21). This invention also deals with an electrical compression connector comprising a second conductor receiving channel that comprises opposing concave surfaces having different shapes, wherein a radius of curvature of the second of the concave surfaces located at the bottom of the second conductor receiving channel is smaller than the radius of

curvature of the first one of the concave surfaces (claim 24). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record. Claims 2-4 and 7-12 are depended upon allowed claim 1, claims 14 and 31-32 are depended upon allowed claim 13, claims 16-17 and 19 are depended upon allowed claim 15, claims 26-30 and 33 are depended upon allowed claim 24, and therefore all of the claims are allowed.

***Drawings***

3. The drawings were received on April 23, 2003. These drawings are approved.

***Response to Arguments***

4. Applicant's arguments filed January 20, 2004 have been fully considered and they are persuasive. Specifically, the applicant's argument that none of the cited prior art of record teach or suggest the radius of the second curved contact surface being smaller than the radius of the first curved contact surface is persuasive and therefore the claims have been allowed.
